**More than
just a package.**

It's a cooking platform that delivers premium food quality from any oven.

Allows for **Protection** of **Gluten-Free products**.

Enhances food selection, quality, and menu flexibility resulting in **foodservice revenue growth!**

Consider ALL the Advantages

Chef Pack®—the bake in the bag innovative cooking solution.
The one bag that does it all.

- Unique qualities of the bag allows the humidity of the product to be controlled during cooking or baking
- Sustainable, no plastic film used
- Product stays warmer longer as the bag holds heat in.
- Product browns beautifully during the heating cycle.
- Product is in a controlled environment from factory to customer
- Suitable for cooking in a variety of ovens
CONVEYOR, ACCELERATED COOK, COMBI, CONVECTION, MICROWAVE
- Suitable for cooking temperatures up to 500°F
- Reduces consumable costs because there is no need for:
External packaging
Tray liners or baking paper
Disposable gloves for food handlers
Final packaging to wrap product

An Exceptional Gluten-Free Option!

- Allows for protection of Gluten-Free products, including

PIZZA

ROLLS AND BAKED GOODS

PANINIS

- Product is in a contained environment
- Sustainable, no plastic film used
- Product stays warmer longer as the bag holds heat in.

Presenting Your Product at Its Best.

Conventional PET
packaging after heating.

The new
Chef Pack®
after heating.

Outstanding Performance in all Cooking Platforms

Conveyor Ovens

Pizza cooks to a beautiful brown crust with perfectly melted cheese.

Convection Ovens

Excellent surface grilling while preserving the delicate tenderness of the fish.

Combi Ovens

Pasta cooks to the perfect al dente texture.

Microwave Ovens

Fried fish sticks crisp up beautifully on the outside and maintain a flaky texture inside.

Accelerated Cook Ovens

Safe for cooking temperatures up to 500°F.

Custom Designed for Your Cooking Needs

Chef Pack® is manufactured to the individual requirements of each food product. This allows for maximum cooking performance and optimal taste. This unique design assures that the consumer receives a high quality food product.

Unlike PET packaging, Chef Pack® is designed to enhance the cooking of your food. Chef Pack® is not a standard off the shelf packaging product.
